K line+

Welcome to the world of streaming with our K-Line! Easy entry and proven features, packed into a robust housing, offer a first-class streaming experience. In this model, we have deliberately omitted a DVD player to make room for the future of entertainment.

Control via app

Our TVs can be controlled via the original LG "ThinQ" app. A virtual remote control is available via the app. With this, the TV can be conveniently controlled via the smartphone or picture or video content can be played back on the TV.

Content Store

New store, new possibilities. Through WebOS Hub, our devices offer access to the Content Store. All apps stored here are specially adapted to the conditions of the TV and the resolution. Regular updates always offer maximum security and innovation. All important apps, regardless of whether they are Netflix, Amazon Prime Video, Disney+ or WOW, can be found here.
